### **Acetylene regulator Cat. No. 2931**

**Reference:** 2931

**Price:** 106,35 € Excl. Tax 127,62 € Incl. Tax

#### **Description**

Designed as an integral part of the Koro oxyacetylene set Cat. No. 2907, this EN ISO 2503-compliant acetylene regulator, coupled with the oxygen regulator Cat. No. 2930, offers excellent visibility with its 2 pressure gauges and is shaped to match the curve of the gas cylinder.

When combined with oxygen, acetylene produces the hottest and most concentrated flame of any combustible gas (3100°C).

Manufactured in France and designed to be simple and compact, the pressure gauges are fitted with a single soft rubber cover that ensures robustness and easy handling.

Featuring a built-in safety valve, a patented system ensures that this regulator delivers constant operating pressure throughout the cylinder's lifetime, right up until the point of equilibrium between the upstream pressure (residual pressure of the cylinder) and downstream pressure (service pressure).

Supplied on a hang tab, it is available at your regular dealer and (during the lockdown) it can be purchased online.
