ATG brazing rods Cat. No. GE206GC

Reference: GE206GC

Price: 168,13 € Excl. Tax 201,76 € Incl. Tax

Description

ATG brazing rods Cat. No. GE206GC (506 B) with 6% silver!

Alloys approved by the French organisation Certigaz are manufactured to ATG specifications. They can therefore be used in installations containing gas. Only the use of the GE6GFA stripper and Express ATG rod combination will guarantee a perfect seal for your gas-containing installations.

The specific advantages of this reference GE206GC include good corrosion resistance and total absence of cadmium.

Our Ref. GE206GC is sold in 500 g packs with rods \varnothing 2 mm - L 500 mm.

This GE202C reference offers basic fluidity but good capillarity. It is ideal for professionals responsible for fuel gas installations, construction and craftsmen responsible for copper/brass fittings.

Outside ATG, soldering professionals who work on plumbing, sanitary and air conditioning systems, as well as those working in industry and on electric motors, should find this soldering rod reference a high-quality consumable.

This product is available for sale online and can be delivered to you within 72 hours of receipt of your payment.
