Biopropane gas cartridge Cat. No. 448

Reference: 448

Price: 7,68 € Excl. Tax 9,22 € Incl. Tax

Description

Had you ever imagined it would one day be possible to reduce your CO2 emissions by 20% without compromising performance—while still using LPG gas?

Well, it is now possible, thanks to the R&D efforts of Guilbert Express. They've successfully adapted two of their flagship products - the cordless roofer's iron (Cat. No. 364) and the heat hot air gun (Cat. No. 4600) - to work with this new gas blend, all while maintaining identical performance levels.

The gas cartridge Ref. 448 (60g) now contains 26% biopropane, produced from renewable sources such as recycled oils and plant-based agricultural oils.

Still allowing for immediate inversion, this cartridge can be used year-round, even in temperatures as low as -13°C (8,6 °F).

This brand-new biopropane gas cartridge is sold exclusively in packs of 12 and can be delivered to your doorstep within 72 hours of payment receipt.
