Coated brazing rods Cat. No. GE340EE

Reference: GE340EE

Price: 70,86 € Excl. Tax 85,03 € Incl. Tax

Description

White coated brazing rods with 40% silver!

Coated brazing is done using a filler metal that takes the form of a rod coated with a pickling flux designed to protect the metal from oxidation.

The advantages of this technology include ease of use, excellent application for delicate and meticulous assemblies, and good mechanical strength.

More specifically, these brazing rods Cat. No. GE340EE are sold in packs of 3 rods - Ø 2 mm - L 500 mm.

This reference GE340EE is particularly recommended for delicate brazing of homogeneous or heterogeneous assemblies, where its excellent wetting properties and reduced heat input work wonders!

It is ideal for professionals in the refrigeration and heating (HVAC) industry, as well as in ventilation, the automotive industry, the electrical industry, domestic appliances and food processing equipment.

Note that this product offers high fluidity and is available for sale online in your country. As such, it can be delivered to you within 72 hours of receipt of your payment.
