Koro oxyacetylene kit Cat. No. 2905

Reference: 2905

Price: 354,40 € Excl. Tax / 425,28 € Incl. Tax

Description

Initially designed to provide plumbers and refrigeration engineers with a tool that offers the best possible value for money, the Koro Kit Cat. No. 2905, a French-manufactured oxyacetylene torch, has rapidly become popular in the areas of bodywork, locksmithing and boilermaking.

This is no surprise, given the high performance levels and robustness of the kit, which features a brass body and burner that make it extremely user-friendly. The burner is interchangeable with a range of malleable burners to meet the specific needs of each user.

It delivers great power with 6 tips, from 63 to 315 L, and a flame temperature that can

reach 3100°C!

It comes as standard with a 160 L tip, but can be used to braze copper pipes with a diameter of up to 42 mm when fitted with a 315 L tip!

With its 5-metre ISO 3821-compliant hose, users have the freedom of movement to carry out all types of jobs.

The Koro oxyacetylene kit Cat. No. 2905 comes with 2 dedicated compact regulators – oxygen Cat. No. 2930 and acetylene Cat. No. 2931 – with a rear attachment that reduces knocks during use.

This kit also includes 2 flashback arrestors for hoses Cat. No. 2921, which prevent reverse gas flow and flame flashback, thereby eliminating the risk of accidents.

Supplied with protection goggles and the Express ignitor Cat. No. 5460, the Koro kit Cat. No. 2905 is, like all Express brand products, available exclusively at your usual distributor.
