Open-flame roofer soldering iron Cat. No. 330-3

Reference: 330/3

Price: 96,17 € Excl. Tax 115,40 € Incl. Tax

Description

Particularly popular among roofers, this open-flame gas soldering iron is ideal for jobs involving zinc and pre-weathered zinc roofing, stainless steel assemblies or lead features.

More generally, this roofer soldering iron is suitable for any work requiring precision and steady heat.

A swivelling connection handle prevents winding of the hose, while a stainless steel side deflector effectively contains the flame. The thumbwheel on the handle enables simple and steady control of the gas flow.

Another significant advantage offered by this tool is that it can be used with any of three roofer soldering iron burner in the Express range, Cat. No. 332, 333 and 335, according

to the requirements of the job.

The handle also provides a high level of flexibility.

Compatible with a direct gas connection (butane) or a 2-bar Express regulator such as Cat. No. 682, for use with propane, this product offers a superb trade-off between price and quality, and sets the standard for professionals looking for a combination of reliability, ease-of-use, robustness and value-for-money.

This high-quality product stands out from the competition with the choice of materials used and excellent construction. Everything you would expect from an Express product...

This roofer soldering iron Cat. No. 330-3 is available at all dealers that choose quality and, therefore, Express products.
