Oxygen regulator Cat. No. 2930

Reference: 2930

Price: 106,35 € Excl. Tax 127,62 € Incl. Tax

Description

Designed as an integral part of the Koro oxyacetylene set Cat. No. 2907, this EN ISO 2503-compliant oxygen regulator, coupled with the acetylene regulator Cat. No. 2931, offers excellent visibility with its 2 pressure gauges and is shaped to match the curve of the gas cylinder.

Designed to be simple and compact, the pressure gauges are fitted with a single soft rubber cover that ensures robustness and easy handling.

Featuring a built-in safety valve, a patented system ensures that this regulator delivers constant operating pressure throughout the cylinder's lifetime, right up until the point of equilibrium between the upstream pressure (residual pressure of the cylinder) and

downstream pressure (service pressure).

Supplied on a hang tab, it is available at your regular dealer.
