Pickling paste for brazing Cat. No. GE6GFA-50

Reference: GE6GFA-50

Price: 11,30 € Excl. Tax 13,56 € Incl. Tax

Description

The boric acid-free pickling paste for CuPh Ag brazing cat. No. GEGFA-50 (100D) is designed for assembly work on copper metals, sanitary pipes and gas pipes.

The role of this 100D pickling paste is, above all, to dissolve the various oxides prior to assembly, while protecting the parts to be joined from possible oxidation, by allowing the formation of a thin continuous film that will protect the parts from oxidation.

The use of a flux stripper is therefore highly recommended for fuel gas installations, work on copper/brass fittings and, OUTSIDE ATG, plumbing and sanitation, work in the electric motor industry and work on air conditioning.

Note that this product is ready to use and complies with the recommendations of the Certigaz organisation.

Like all Express products, it is available from your usual retailer and online.
