Silver brazing rods Cat. No. GE202B

Reference: GE202B

Price: 121,65 € Excl. Tax 145,98 € Incl. Tax

Description

Brazing rods with 2% silver!

Brazing is traditionally done with copper- and phosphorus-based rods, which are available with or without silver. The brazing temperature should be between 600 and 850°C.

The more silver the rod contains, the better the wetting properties and the easier it is to apply the material.

The specific advantages of this reference GE202C include very good corrosion resistance.

Our Ref. GE202B is sold in 1 kg packs. Ø 2 mm - L 500 mm.

This reference GE202B offers good fluidity and will find its place among professionals in air conditioning, plumbing and ventilation, refrigeration, electricity and, more generally, among all those involved in fluid transport circuits.

Please note that this product is available for sale online and can be delivered to you within 72 hours of receipt of your payment.
