Soldering flux Cat. No. GE6GFA-200

Reference: GE6GFA-200

Price: 29,61 € Excl. Tax 35,53 € Incl. Tax

Description

The boric acid-free pickling paste for CuPh Ag brazing Cat. No. GEGFA-200 is designed for assembly work on copper metals, sanitary pipes and gas pipes.

The role of this 100D pickling paste is, above all, to dissolve the various oxides prior to assembly, while protecting the parts to be joined from possible oxidation, by allowing the formation of a thin continuous film which will protect the parts from oxidation.

The use of a flux stripper is therefore highly recommended for fuel gas installations, work on copper/brass fittings and, EXCLUDING ATG, plumbing and sanitation, work in the electric motor industry and work on air conditioning.

Note that this product is ready to use and complies with the recommendations of the French organisation Certigaz. It is ATG-certified.

This reference is available for sale online and can be delivered within 72 hours of receipt of your payment.
