Titanium Piezo torch Cat. No. 150TPL400

Reference: 150TPL400

Price: 148,72 € Excl. Tax 178,46 € Incl. Tax

Description

Made with titanium and aluminium, the new Guilbert Express range of titanium piezo burners does away with the need for professional roofers to use an external ignition source.

The burner can be lit with a single press on its piezo ignition. In addition to being handy for the user, this Express innovation increases work-site safety: easier ignition means it is no longer necessary for roofers to keep the tool in "pilot burner" mode, which has frequently been a source of fire outbreaks in the past.

This burner Cat. No. 150TPL400 is part of a wide range of roofing burners, with power outputs ranging from 50 to 150 kW and neck tubes of 130 to 400 mm in length,

according to the type of work being done (vertical-horizontal joints or flat roofs). Together they cover practically all situations encountered in conventional roofing jobs.

Providing 150 kW of power at 4 bar, and weighing less than 400 g, the titanium Piezo torch Cat. No. 150TPL400, with its 400 mm burner, is part of Guilbert Express' efforts to develop product solutions that reduce the risk of musculoskeletal disorders (MSDs) among roofing professionals.
