

HOLE BURNER ^{NEW}

Farming

The ideal tool to hot-punch holes in woven plastic mulch and any other plastic used for planting under film.

Precise flame control: adapts to different materials

Ergonomic handle: optimized user comfort

Optimal safety: for the user and the work environment

Simplified maintenance: the neck tube, nozzle and trigger piezo igniter can be removed without tools

Gas cartridge mounted on the handle: total freedom of movement

Durable: stainless-steel tube for long service life, even in humid or saline environments

Interchangeable neck tube and punch disc: adaptable to different crops or mulch types to perforate

Easy-to-change punch disc with just a hex (Allen) key

Fast heat-up: ideal for perforating woven plastic mulches

High productivity
To meet the demands of intensive market gardening

Lightweight: 1.4 kg / 3.1 lb with cartridge Easy to handle, reduces fatigue during long work sessions

Heat-up time: 2 minutes
Quick start to save time in the field

Runtime: approx. 2 hrs
Gas consumption: 166 g/h - 0.37 lb/h
